Turner Workflow Manufacturing

Commitment To Quality Manufacturing

Committed to quality manufacturing TWM based in High Wycombe, Buckinghamshire are world-leaders in the design, development and production of both low and mass volume Springs, Wire Forms, Pressings and Stampings servicing clients world-wide

Quality Assured

All TWM's processes and procedures conform to the BS EN ISO 9001:2000 Quality standard

We continuously review our commitment to the ISO standard and undertake regular internal quality audits to ensure constant evolution of our management and manufacturing practices

Service & Support Commitment

TWM's Product Design & Support Centre staffed with qualified design and tooling engineers work with clients to ensure technical and qualitative attributes for your specific product requirements are fully realised

Working in Partnership

At TWM we are committed to working in partnership with our Clients and Suppliers alike in order to manufacture quality products in accordance with clients technical specifications and logistical requirements

Safeguarding our Environment

We constantly evaluate the impact of our facilities on the environment and work with a number of government and independent organisations to ensure we constantly review and reduce our exposure to the environment

Design & Development

Our fully equipped tool room with dedicated engineers together with our Product Support and Design Centre provide Customers with a rapid turnaround service for new product design requirements. Further our in house tooling facilities ensure that TWM maintain expensive tools throughout the production life cycle thereby ensuring conformity to product quality

Facilities

Our facility, comprising 27,500 sq ft incorporates over 50 Spring Coiling and Press plant for both low and mass volume production

Embracing Technology

TWM constantly review and evolve its technological capabilities. Substantial investment in expert IT systems, Design and Development Software, Plant and Machinery result in improved processes and performance thereby maximising our efficiencies and economies of scale

Health & Safety

Our Health & Safety policy is of paramount importance to the well being of our staff and the general public. Our Management team together with independent consultants regularly review guidelines and undertake annual assessments of our Health & Safety policy and procedures.

Memberships

TWM is committed to supporting and benefiting from a number of associations and institutions. By working in partnership with external trade bodies TWM keep abreast of the latest trends and techniques throughout our industry

Protoype & Sampling

TWM - provide a rapid turnaround service for prototyping and sampling projects. Testing the feasibility of new projects can be undertaken quickly

Design & Tooling

TWM - Our Product Design and Support centre is available to assist Customers in early stage client specific design through to mass production. Our tool room is equipped with the most advanced engineering tools enabling specific Customer developments are undertaken efficiently

Production

TWM - Production facilities cater for both low volume and mass volume production in accordance with customer specific call off schedules and logistical needs

Pressings / Stampings

TWM - utilise mechanical and hydraulic automatic, single action and multi slide presses. TWM also provide manual presses and purpose made press tools enabling complex value added 2nd operations ensuring product conformity

Springs & Wire Forming

TWM - Utilise state of the art Spring Coiling and Wire Forming technology specialising in wire sizes from 0.1 mm - 4.00 mm. TWM manufacture in accordance with customer specific requirements

Standard Products

TWM - hold a wide range of stock of standard components and heat sink clips utilised by customers world-wide for immediate despatch

Finishing

TWM - provide a state of the art Cleaning - Passivation - Degreasing and Heat Treatment centre providing an entirely programmable solution for customer specific requirements

Sub Assembly

TWM - catering for light electrical and light mechanical sub assemblies. Our Assembly facility caters for the outsourcing of final manual adjustment of parts and the assembly of multi parts

Stockists

TWM - Hold stock of raw materials enabling rapid turnaround of sampling projects and safeguarding mass production needs
