Outsource your Pressing Production

Benefit from our fully equipped Press Shop and Tool Room

Control & Inspection Managing Conformance

Second Operations / Assembly

Our fully equipped second operation facility gives flexibility to your specific end user requirements. Bench presses enable fine manual adjustment to parts and the assembly of multi parts.

Quality Assured

It is the established policy of T.W.M to provide its customers with products which conform to their specified requirements. To this end T.W.M has committed itself to the principles of the BS EN ISO 9001:2000 Quality management system, including quality objectives and management review to ensure continuous improvement of the effectiveness of the system.

Automatic Multi-Slide Press Shop

6 – 40 tonne capacity
Single action operator capacity

Pressing Tool

Our Design Team have a fully equipped tool room to design, prototype, build and maintain tools ensuring consistency and continuity of production. T.W.M ensure quality production at all times as set-up approval and regular inspection and monitoring is undertaken throughout the production process.
