Springs & Wire Forming

Product Design & Support Centre

T.W.M offer clients a rapid turnaround service for Spring & Wire Form design, prototyping and sampling.

Our dedicated support centre is equipped with the latest design technologies including Auto Cad and Helical Spring design techniques.

Service Quality Assured
All T.W.M processes and procedures conform to the BS EN ISO 9001:2000 quality standard.

Spring Wire sizes 0.1mm - 4.0mm

Design & production for the most complex to simplest spring requirements.

Low & Mass Volume Spring Production

With over 30 computer controlled Spring Coiling machines we ensure fast and accurate production to the highest of quality standards. Operated by a dedicated team of skilled operators and controlled by our internal inspection department ensures Quality and Servicestandards are achieved.

Contact our Commerical Team and Product Support Centre for your enquiries on +44 (0) 1494 556700 or email info@twm.gb.com

Degreasing - Passivation Cleaning, Heat Treatment

At T.W.M we compliment Spring production by providing a fully automated Cleaning, Passivation and Degreasing facility.

Scragging Facility

Our Heat Treatment facility and a process known as Scragging ensures the stresses induced during manufacture are removed and springs are pre-set to required lengths prior to shipment.

Wire Stockists

T.W.M hold a comprehensive stock of wire enabling fast prototyping, sampling and production.

Compression Springs

Extension Springs
