

Turner Workflow Manufacturing

## Sub Assembly

T.W.M recognise and appreciate the requirements for companies to reduce the amount of component assembly and the benefits that can be gained by out-sourcing these, thus allowing them to focus on the more complicated final assembly of their product.

Contact our Commercial Team and Product Support Centre for your enquiries on +44 (0) 1494 556700 or email [info@twm.gb.com](mailto:info@twm.gb.com)

Through substantial investment, and complimenting our manufacturing services of springs, light metal pressings and automatic wire and strip forms, we offer clients the facility of in-house sub-assembly, catering for a wide diversity of both light electrical and mechanical work.

T.W.M have fully kitted assembly lines, catering from simple component assembly to the more sophisticated fully automated procedures, with ability to take on work from the most basic to multi component complex sub-assemblies.

Customer satisfaction is at the top of the agenda at T.W.M. Our flexibility, quick response, competitive pricing, commitment to quality and overall first class service ensures customer satisfaction.

### Quality

T.W.M are proud to produce, highly engineered quality components, for use in a wide variety of domestic and commercial products. All components are manufactured on our premises, from tooling produced in our own tool room, and under close quality conditions through all production elements.

### Commitment to Quality

Not only is this policy sound commercial practice but it accords with the fact that statutory & legislation requirements covering fitness for purpose and the performance of products is increasing. Moreover there is a greater tendency for larger purchasers to buy from suppliers who have sound quality systems and an increasing public concern with quality of products generally.

**Adherence** to this policy involves every aspect of the company's business, a copy of this statement, is available to all employees, along with any procedures, written or otherwise needed to satisfy the quality / policy requirements.

**T.W.M - Quality Assured**

### Commitment to Standards & Certification

The Company has committed itself to the principles of the BS EN ISO 9001:2000 quality management system, including quality objectives and management review to ensure continuous improvement of the effectiveness of the system.

### Commitment to working Partnerships

T.W.M is working with its Customers to achieve further quality approvals, such as those associated with the automotive industry
